

Sheet No. 3 (Projection of Solids)

CO 3: Draw projection of regular solids.

1. A hexagonal prism of 35 mm edge of base 25mm and axis length 70 mm is having an edge of base in the HP rectangular face containing that edge is inclined at 30° to the HP. Draw the projections.
2. The cylinder with base diameter 50 mm and axis length 70 mm has its axis inclined at 30° to VP. Draw the projections of cylinder when it is resting on one of the circumference points of base in VP.

Sheet No. 4 (Section of Solids and development)

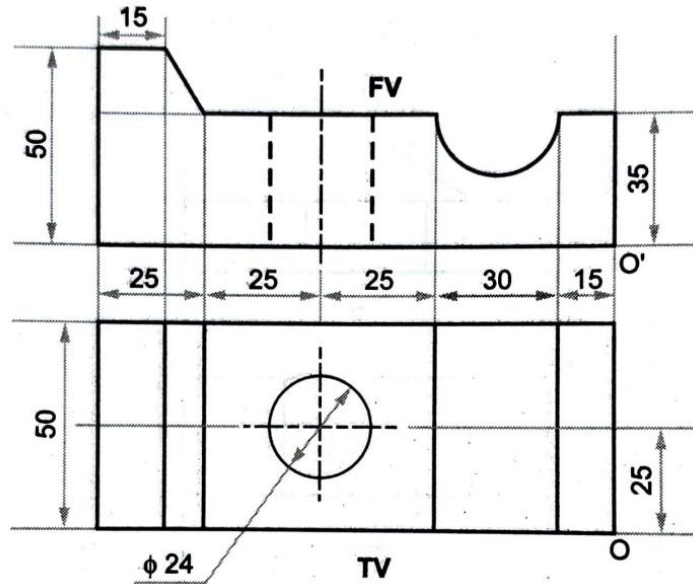

CO 4: Draw sectional views and lateral development of regular solids

1. A cylinder of 40 mm diameter and 60 mm is resting on its base on HP. It is cut by a section plane perpendicular to VP inclined at 45° to HP passing through the midpoint of axis. Draw FV, sectional TV and also develop the lateral surface of the cut cylinder.
2. A square pyramid of 40 mm edge of base and axis 70 mm is resting on its base with one of the base edges perpendicular to VP. It is cut by an AIP in such a way that it bisects the axis and is inclined at 45° to the HP. Draw FV, sectional TV and also draw the development of lateral surface.

Sheet No. 5 (Isometric Drawing)

CO5: Visualize and draw isometric drawing.

1. Figure shows the front view, Top view of an object. Draw its isometric drawing about an origin 'O'.

2. Figure shows the Front view and side view of an object. Draw its isometric view about an origin 'O'.
